

AzaleaONE™ Connecting Your Entire Health System

The Leading Cloud-based Platform, Tailored To Your Needs.

A powerful and reliable engine that powers your hospital.

Azalea Health Innovations connects healthcare silos enabling health systems to cut costs and provide better patient care. We support the unique workflows of your hospital, including the emergency department, inpatient care, swing beds, and the ease of transition between departments. With our tightly integrated Patient Financials, Hospital Management, and Clinical Solutions, AzaleaONE is built with your organization in mind.

With minimal upfront investment cost, low monthly pricing, and no capital expense requirements, Azalea offers superior value. Our professional services deliver immediate revenue cycle enhancements that support your organization's financial goals.

Access Anywhere, Anytime

Our web-based solution hosted on the leading cloud platform, Amazon Web Services (AWS), provides a true multi-tenant SaaS environment. With zero server footprint and minimal IT support required, you no longer need to worry about accessibility or VPNs.

Fast Healthcare Resources

Built on the FHIR framework, the next generation of information exchange to advance interoperability. Using the latest web technologies to aid rapid adoption, FHIR allows EHRs to share patient data among clinicians and organizations while being flexible to meet a wide variety of needs.

Automatic Updates

Solution enhancements and new features are released live as ready, eliminating disruption, delayed upgrades, and constant maintenance. Our Cloud-based EHR is the most affordable option that not only saves you money, but gives you time back in your day.
