

# Azalea Health Innovations

Our mission is helping underserved healthcare providers improve patient care and profitability.

## Who We Are

Azalea Health Innovations was founded in 2008 in Valdosta, GA and is now headquartered in Atlanta, GA, with employees across the country. The founders of Azalea Health, while working at a medical laboratory company, observed that most EHRs were clunky, and physicians had a hard time understanding how to use them. As a result they were determined to develop a solution that would simplify the life of physicians and administrators.

## What We Do

Azalea provides a leading cloud-based Health IT platform connects community-based healthcare providers and patients across the lifecycle of care delivery – in the hospital, at the practice and from home.

## Who We Serve

With over 300,000 unique users and 20 million+ patients served across 15,000 medical providers- Azalea serves hospitals, health systems, speciality practices, rural health clinics, community based healthcare, behavioral health facilities and more.

## Awards & Recognitions

Azalea is one of eight included in the Inc. 5000 Fastest Growing Companies for three consecutive years, voted Best Electronic Health Record Solution by MedTech Breakthrough in 2018 and 2021, and a leader for GetApp Telemedicine Category in 2020.
