

Azalea Telehealth For Practices

An Integrated Workflow To Treat Patients Anywhere, Anytime.

Advanced patient care delivery you can rely on.

Azalea Health Innovations offers a HIPAA-compliant, proprietary telehealth platform that is fully integrated in our 100% cloud-based EHR. With our user friendly mobile applications and patient portal, it's never been easier to conduct a telemedicine visit for both providers and patients. Our platform allows for simple care coordination while providing an additional revenue stream for providers across the country.

Integrated Workflow

Schedule and bill telehealth visits directly from the Azalea EHR platform. With our live streaming capabilities and recording functionality, you can easily save a telehealth session directly to a patient's record and streamline documentation.

Greater Patient Access

Increased patient accessibility, convenience, and care coordination to fit your long-term strategy and needs. Say goodbye to temporary, non-compliant tools that don't compliment your workflow.

Remote Specialist Access

Overcome physician shortage challenges by connecting patients with remote specialty care providers.

Additional Revenue Stream

An efficient alternative to traditional office visits, telehealth allows your facility to open up new revenue streams. Leverage new reimbursement guidelines and stay connected when it matters most.
